

# **2019 Annual Report**

#### Letter from the Director

In 2019, your gifts of funding, time, and talents delivered healthcare, education and opportunity to 1,910 vulnerable women and children. With your help, families are lifted up and they gained tools to continue to lift themselves out of the cycle of poverty.

This year, Health & Hope volunteers were honored to deliver dental, medical and vision care to 1028 people who lacked other access to healthcare. Every patient we touched, you touched. Health & Hope Programs link healthcare and education to

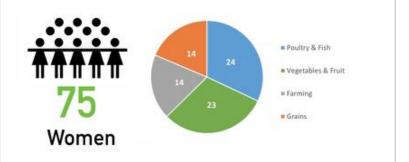

promote sustainable change. Your funding provided 200 orphaned and vulnerable children a safe, nurturing anchor and free education at Tumaini Tutor School 6 days a week. Through your generous giving in our year end campaign, our 6 Tumaini teachers are supported through 2020. Sponsorship of 20 promising Tumaini Tutor provided funding so that they can attend public school. A Grant was awarded to increase and enhance our nutrition program. 35 of the most underfed children receive meals 6-7 days a week, every week. Donor gifts provided much needed new student tables, benches and bookshelves. Furniture building became a vocational experience as Tumaini students worked along with local craftsmen to create school furniture.

Your 2019 Give Big donations mean 15 additional women now have economic opportunity. The Women's Business Group has grown to 75 widowed or abandoned women who are focused and successful. Four important Grants were awarded to the Business Group in 2019, allowing the women to take their businesses to the next levels, while they increase access to the community food supply.

HHF volunteers created the first annual Leprechaun Leap 5K Run/Walk in Woodinville. This fun event brought local families together to enjoy a meaningful fitness activity. Proceeds benefited HHF programs that empower and educate.

Your support, help, and thoughts are deeply appreciated. They have traveled far, are safely delivered, and now impact ongoing change to improve lives. This is the launch pad for 2020.

In Gratitude, Loree Bolin, DDS Director, Health & Hope Foundation

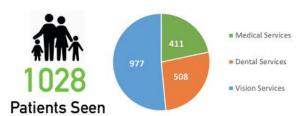

Women's Business Group, Grants Awarded:

- \* 200-egg incubator to improve poultry hatch rate
- \* Solar fish dryers to speed drying time and decrease spoilage
